Outdoor Living Solutions

A NEW DEFINITION OF OUTDOOR COMFORT

Transform your outdoor areas into all season living spaces. The pergola system blends modern design with smart functionality, adding both elegance and comfort to your environment. Whether it's a terrace, veranda, garden, or poolside, it offers a stylish shading solution.

Available in both manual and motorized options, this system provides tailored solutions for every need offering shade from the sun in summer and a waterproof shelter on rain days.

MANUAL

The system is operated with a detachable hand crank, allowing you to easily adjust the louvre position for ventilation or full shade.

It offers a reliable and cost effective solution for outdoor comfort without the need for electrical components.

MOTORISED

The pergola's louvre roof is powered by a concealed motor, allowing you to open or close the slats with a remote control.

With just a single touch, you can adjust the shade and airflow offering modern convenience and enhanced user experience for your outdoor space.

Rainwater is efficiently guided through concealed gutter channels located within the roof structure and is then directed down through the inner sections of the pergola legs, safely draining to the ground. This smart solution keeps your outdoor space dry and usable all year round without compromising the sleek, modern appearance of the structure.

TERRACES

WEATHERPROOF DESIGN SMART SOLUTION

The pergola features an ingeniously integrated drainage system that ensures complete protection against unexpected weather changes.

When the louvred roof is fully closed, the system creates a sealed surface, preventing rainwater from entering the covered area.

UNIFIED CONTROL WITH A SINGLE REMOTE

Accessories such as sliding glass system, zip screen and LED lighting integrated into the pergola system can be operated simultaneously with a single remote control. This provides maximum comfort and ease of use for the user.

You can adjust the lighting, raise or lower the screens, or reposition the glass panels all with a single touch.

”

INTEGRATED DRAINAGE SYSTEM

When the louvres are closed, rainwater is directed through hidden gutter channels into the left profile and drained to the ground creating a fully waterproof area.

DURABLE & LOW MAINTENANCE STRUCTURE

The powder coated aluminium construction is resistant to corrosion and designed for long lasting use, even in harsh weather conditions.

SLEEK & MODERN APPEARANCE

With clean lines, a minimalist structure, and a wide range of RAL Color options, it harmonizes effortlessly with any architectural style.

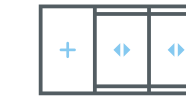

Optional integrated LED Lighting, remotely controlled, enhances nighttime ambiance while complementing the pergola's modern look.

MODULAR DESIGN & FLEXIBLE DIMENSIONS

Thanks to its modular structure, the pergola can be tailored to fit various sizes and layouts, allowing seamless integration into terraces, patio, gardens, or poolside areas.

SLIDING GLASS SYSTEM FOR MODERN LIVING

Sliding glass systems are the most elegant way to connect your living spaces with nature. Their transparent design creates a seamless transition between indoors and outdoors ideal for both residential and commercial projects

SMOOTH SLIDING SYSTEM

Thanks to the durable and specially designed track system, glass panels slide smoothly, quietly, and effortlessly ensuring ease of use and long lasting performance.

FLEXIBLE DESIGN, EFFORTLESS USE

SLIDING FUNCTION ENSURES SPACE SAVING DESIGN

Sliding glass panels move horizontally with exceptional ease, providing a highly flexible and user friendly experience. Thanks to the floor integrated, durable rail system, the panels glide quietly and smoothly ensuring reliable performance over time. This allows effortless transitions between open and closed positions.

SILENT OPERATING MECHANISM

Thanks to its advanced design, the glass panels open and close with minimal noise. This silent movement provides both comfort and aesthetic refinement.

SEAMLESS PANORAMIC VIEW

Wide glass surfaces and a frameless design offer maximum visual contact with the outdoors. Enjoy your view without any interruption.

ROBUST MATERIALS, LONG LASTING PERFORMANCE

TEMPERED GLASS AND ALUMINIUM ENSURE YEARS OF DURABILITY

Powder coated aluminium profiles provide excellent corrosion resistance, while tempered glass panels withstand impacts and tough weather. The system requires minimal maintenance, ensuring a user friendly experience.

LONG LASTING STRUCTURE

Thanks to high quality aluminium and tempered glass, the system offers safe and reliable use for many years. It is resistant to impacts and harsh weather conditions.

CORROSION RESISTANCE

Powder coated aluminium profiles offer maximum protection against moisture and environmental effects. This ensures long term performance and aesthetic appeal in outdoor use.

UV PROTECTION

The glass panels filter harmful UV rays, protecting the interior from sun damage and preserving furniture and decor over time.

TRANSPARENT COMFORT, MODERN TECHNOLOGY

Vertical Sliding Glass Systems (Guillotine) offer both ease of use and a sleek appearance thanks to their vertical motion design. Available in motorized options, they adapt to a variety of spaces like cafes, restaurants, terraces, and balconies. They protect against weather conditions and make outdoor areas usable year round.

WINDOW TO NATURE

Winter garden systems create a seamless transition between indoor and outdoor environments. Thanks to expansive glass panels, spaces are bathed in natural light while maintaining uninterrupted views of nature.

Regardless of the season, you remain surrounded by lush greenery, enhancing your living area with a sense of peace and openness.

DURABLE & INSULATED

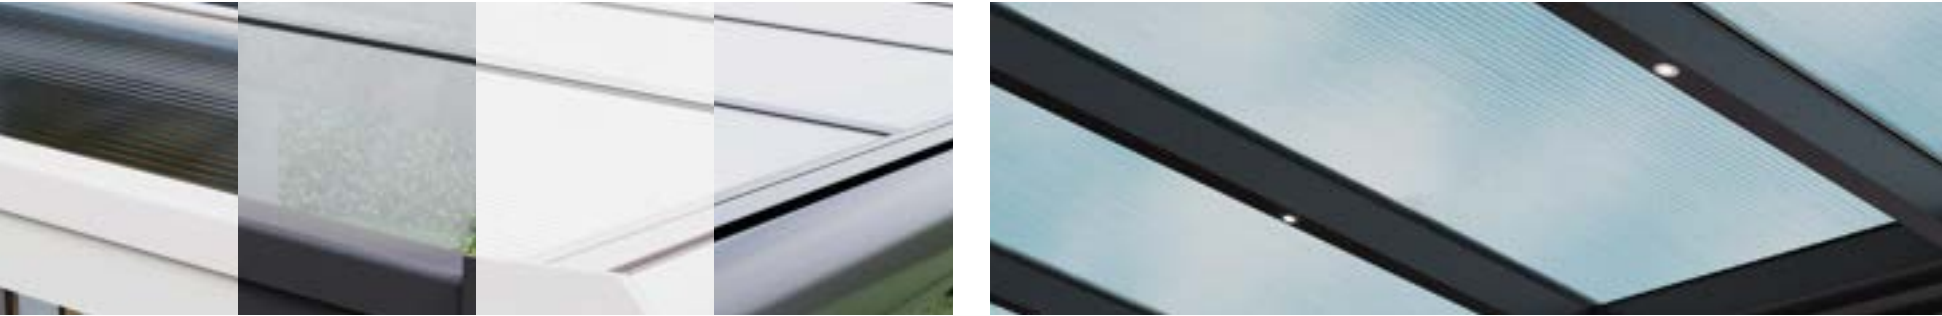

Our powder coated aluminium profiles deliver exceptional resistance against corrosion and harsh environmental conditions.

With thermally insulated glass and panel options, interior temperatures remain consistently comfortable year round, ensuring energy efficiency and wellbeing.

ROBUST AND STYLISH IN EVERY DETAIL

Our winter garden systems are built with powder coated aluminium frames that ensure excellent resistance to corrosion and harsh weather conditions. While remaining lightweight, they offer a strong and reliable structure for long term safety and durability.

These systems can be equipped with various material options such as glass and polycarbonate, and optional ambient LED lighting can be integrated to enhance comfort and atmosphere.

The quick and efficient installation process makes them an ideal choice for both new projects and existing structures, providing added functionality without compromising style.

GARAGE

WINTER GARDEN SYSTEMS FOR GARAGE USE

Winter garden structures are not only for living areas they can also be adapted to protect garage spaces all year round. Thanks to transparent panels, natural light flows in, while the aluminium frame provides reliable protection against rain, snow, and harmful UV rays.

COMPATIBLE WITH WINTER GARDEN SYSTEMS

Zip screens can be integrated into winter garden structures to provide year round comfort. They are ideal for filtering sunlight, blocking wind, and creating privacy. With their aesthetic design and optional motorized operation, zip screens enhance both the comfort and energy efficiency of your winter garden.

SLIDING GLASS COMFORT IN WINTER GARDEN SPACES

Sliding glass panels used in winter garden systems provide maximum openness and ease of use without disrupting the visual connection with the outdoors.

By sliding horizontally, the system saves space and creates a flexible living area that blends seamlessly with nature. Made of high quality glass and aluminium profiles, the system ensures protection against wind, rain, and dust.

NEXT GENERATION COMFORT IN SHADING

Zip screen systems are a modern shading solution designed to enhance outdoor comfort. They stand out with their resistance to wind, sunlight, and rain. Available in both manual and motorized versions, they are ideal for use in pergolas, winter gardens, terraces, and balconies.

SMART & SHADING SOLUTION

Zip screen systems maintain constant fabric tension and stability through their specially designed side tracks. This structure provides high resistance against sun, rain, and wind, making them an ideal solution for outdoor living areas.

Available in manual or motorized versions, these systems offer quiet and comfortable operation. They filter sunlight, regulate interior temperature, and provide privacy. With their seamless compatibility with pergolas and winter gardens, they combine aesthetics with functionality.

SYSTEM INTEGRATION

When installed inside pergolas or winter garden systems, zip screens are not compatible with vertical or sliding glass panels.

For all systems to operate seamlessly such as zip screens, sliding, and vertical glass panels the zip screen must be installed externally.

MANUAL

The manual zip screen system offers practical use with a durable hand crank mechanism. As it requires no electrical connection, it can be easily installed in various outdoor spaces. Its silent operation enhances user comfort, while its cost effective nature makes it a popular choice.

MOTORISED

Motorized zip screen systems can be easily controlled via remote or automation systems. Users can position the screen at their desired height, allowing full control over light and shade.

Offering high comfort, especially in wide areas, these systems combine aesthetics and functionality with silent motor technology.

SUSTAINABLE ENERGY, MODERN DESIGN

Transform your parking space into an energy-efficient zone. With their sleek design and green technology, solar carports blend functionality with sustainability offering a modern approach to everyday needs.

POWERED BY THE SUN, ENHANCING YOUR SPACE

SOLAR CARPORTS COMBINE RENEWABLE ENERGY WITH ARCHITECTURAL ELEGANCE.

Solar carports offer dual functionality by combining parking space with clean energy generation. Built with robust aluminum construction, they provide long term durability in all weather conditions. Ideal for both residential and commercial use.

BUILT TO LAST, MADE FOR OUTDOORS

Our aluminum picnic tables are suitable for various outdoor settings with different seating styles, sizes, and surface finishes. Optional features enhance both durability and functionality:

- ☒ Clamp systems provide secure ground installation
- ☒ Bingo leg option adapts to various ground types
- ☒ EPDM strips reduce vibration and noise
- ☒ Center support leg profile offers additional stability for models over 3 meters

Additionally, anti theft features offer extra safety for public use. These enhancements make the tables long lasting, secure, and tailored to modern usage needs.

ELEGANT BOUNDARIES, LASTING PROTECTION

Aluminum garden fences have many advantages. Aluminum design fences are very practical and can make the areas they are used useful in many ways. In addition to being a useful product, they are tools that can make the user feel their experiences.

Aluminium fences that are quite durable and often preferred in gardens are very useful for outdoor security with large and small fence materials.

DEFINE YOUR OUTDOORS WITH STYLE

An aluminium fence is a highly durable, stylish option for homeowners looking to define their yards without blocking the view. Our aluminium fencing selection includes some of the most versatile fences on the market. From pools to yards to public property, aluminium fencing can match any terrain and any architectural style.
